

Ask A PROSWING Coach

Q:What size bat should my son use?

A:Choosing the correct bat for your athlete is very important in their development as a baseball player. Here is an extremely helpful chart that tells you EXACTLY what kind of bat your athlete can use to optimize their success!

BAT SELECTION CHART

The right bat for you is one that lets you generate maximum bat speed. You accomplish this with a bat that's not too long or too heavy. The best way to find the "right" bat is to start with the sizing chart. Then try different size bats in that general length range. The bat that feels "comfortable" and "easy to swing" should be selected.
